Summary

Seasoned Analytics Engineer with over 5 years of experience across Data Engineering, Analytics, Data Modeling and Database Administration. Over the years I have built scalable and production ready pipelines, semantic models, and dashboards using Python, SQL, and various visualization tools. I also have a strong background in using Microsoft stack such as Power Apps, Power Automate, Power BI and integrating them as a unified system. More recently I have been using MCP's to integrate AI into reporting workflows, enabling smarter visuals, optimized data models and faster turnaround on complex reporting needs

Education

The University of Texas at Dallas

M.S. Business Analytics

Richardson, Texas

2022 – 2023

Jawaharlal Nehru Technological University

B. Tech Computer Science

Hyderabad, India

2014 – 2018

Experiences

Twisted X

Decatur, Texas

Analytics Engineer

Nov 2024 – Present

- Designed and developed enterprise semantic data model in Power BI, improving data consistency, accuracy and optimized refresh time schedule.
- Developed 15+ interactive Power BI dashboards and paginated reports, resulting in data driven decision making and enabling sales to achieve 10% increase in bookings.
- Engineered enterprise PowerApps by integrating multiple data sources (SQL Server, SharePoint, Dataverse) with embedded Power BI reports, documents, and Power Automate flows serving over 20 sales representatives.
- Utilized Power BI MCP (Model Context Protocol), to build AI assisted visuals and custom UDF's reducing the time to build complex reports and dashboards.
- Implemented Row-Level Security (RLS) across Power BI environment and PowerApps, ensuring data governance and secure access control for multi-level user hierarchy.
- Built reports for Finance and Logistics to get better visibility to cash flow, freight trends, and inventory management.
- Managed end-to-end Power BI deployment pipelines and workspace governance, implementing CI/CD practices for secure report development and distribution across organization.
- Led Power BI training sessions for cross-functional teams, increasing user adoption by 50% and reducing ad-hoc reporting requests.
- Collaborated with Sales leadership to translate business requirements into technical solutions, serving as an analytics bridge between IT and business operations.
- Designed Snowflake POC integrating NetSuite as data source, establishing foundation for cloud based DW.

Data Analyst I

Feb 2024 – Nov 2024

- Collaborated with sales team to develop reports and dashboards, resulting in a 30% improvement in decision-making.
- Developed reports with a Write Back feature, enabling sales reps to update the data source directly from the reports, thereby maintaining and optimizing leads.
- Developed DAX measures and optimized queries to make data transformations faster and more reliable.
- Built a map-based report to identify location of a rep and map nearby leads, resulting in expanding opportunities.
- Generated reports and saved searches in NetSuite to optimize inventory and logistics operations, resulting in improved supply chain visibility.
- Achieved a significant increase in operational efficiency by automating paginated reports and dashboards.

Data Analyst Intern

Jun 2023 - Dec 2023

- Articulated KPIs with precision by designing and developing reports, dashboards, and paginated reports.
- Recognized and addressed data modeling issue by devising a new data model to enhance data efficiency.
- Engineered functionality within the Twisted X app, reducing order placement time by 87%.
- Streamlined data retrieval for in-depth analysis in Oracle NetSuite by creating efficient Saved searches.

Capgemini Technology Services

Senior Data Engineer

Hyderabad, India

Feb 2020 - Jul 2021

- Developed SQL queries, stored procedures, and user-defined functions tailored for intricate business logics.
- Interacted with business users to gather and understand the requirements and translate them into reports.
- Achieved 45% improvement in query performance by tuning, optimization, and efficient coding standards.
- Created scheduled SQL jobs to run a timely basis used for developing batch reports.
- Enhanced query performance through strategic tuning and optimization, while deploying indexes that reduced IO usage and boosted cache hit rates from 40% to 95%.
- Audited ingestion tables to identify missing primary keys and indexes, then scanned functions to determine single or multi column indexing strategy.
- Assisted in building ETL pipelines, facilitating a seamless migration from on-prem to cloud.
- Demonstrated proficiency in the Agile framework, showcasing expertise in crafting user stories and tasks.

Data Lake Administrator

Sep 2018 - Jan 2020

- Performed maintenance activities like Vacuum, Analyze, and re-index ensuring high performance of the database.
- Executed database backup/restore and collaborated with external vendors for upgrades and patching.
- Configured database access, roles, and authentication modes per policies to ensure security and integrity.
- Developed Python and Bash scripts automating DBA activities and mail alerts, reducing downtime by 20%.

Projects

Truck Fleet Analysis | *Hadoop, Impala, Pig, R, Tableau*

- Imported csv files and conducted a comprehensive analysis of a complex data set using Impala and Pig.
- Built visualizations and insights to support business decision-making using R and Tableau.

Credit Card Default Analysis | *R, Machine Learning*

- Applied KNN classification, Naive-Bayes, and Logistic Regression for the prediction model using R.
- Calculated and visualized the Receiver Operating Characteristic curve with an accuracy of 82%.

Skills

Languages: Python, R, SQL (Postgres, Greenplum, MySQL), NoSQL (Mongo DB), Shell Scripting

ETL/ Viz Tools: Informatica, DataStage, Synapse Analytics, Data Factory, Power BI, Tableau

Analytical Skills: EDA, Linear Regression, Logistics Regression, KNN, Hypothesis Testing, PCA

Data Processing: Snowflake, HDFS, MapReduce, Spark, Hive, Pig

Developer Tools: Databricks, Dax Studio, R Studio, DevOps, Power Automate, Power Apps

AI / Integration: Claude AI (MCP), Prompt Engineering, Copilot

Coursework: Programming for DS, Prescriptive/Predictive Analytics, R-Programming, Advanced Stats

Certification: Microsoft Azure Fundamentals
